Re: Application for the Position of Manager, Information Systems

Dear Sir/Madam,

I wish to apply for the position of **Manager, Information Systems** at Muteesa I Royal University. I have over five years of experience building and managing information systems, and I believe I would be a strong fit for this role.

I formerly served as a **Senior Full-Stack Developer at Eight Tech Consults Ltd**, where I led development of national-scale systems including the **Uganda Livestock Identification and Traceability System (ULITS)** for the Ministry of Agriculture, **School Dynamics**—an education management platform used by 46 schools—and hospital management and wildlife database systems. This work has given me practical hands-on experience in database administration, server management, API development, mobile apps, and end-user training.

I hold a **BSc in Computer Science and Engineering** from the Islamic University of Technology (Bangladesh) and am pursuing an **MSc in Computer Science** at Makerere University, researching blockchain-based federated learning.

What draws me to MRU is its momentum—recently chartered, expanding its STEAD faculty, and clearly investing in innovation. I would like to bring my experience with e-portals, learning platforms, and IT infrastructure to help strengthen MRU's digital systems and support its growth.

My CV is enclosed. I am available for an interview at your convenience and look forward to hearing from you.

Yours faithfully,

Muhindo Mubaraka
